## Co-founders\_

Philippe Gillet (CTO) and Jacques de La Rivière (CEO)

**Jacques de La Rivière** is CEO and co-founder of Gatewatcher. After studying engineering at ESIEA, he began his career with Mahindra Satyam in India as an offshore project manager. He then went on to work as a Sales Engineer at ADNEOM and BK Consulting on high-frequency trading platforms. Jacques is Vice-Chairman of Hexatrust, the consortium of French and European cybersecurity and trusted cloud champions. His cross-disciplinary vision of the cybersecurity business and his passion for technology help to raise the profile of the cyber sector.

**Philippe Gillet** is CTO and Co-founder of Gatewatcher. After studying engineering at ESIEA, Philippe began his career in cybersecurity consulting companies. He worked in the telecom, military industrial and banking sectors as a pentester, SOC analyst and security architect. At Gatewatcher, Philippe is in charge of the development of all the offers and the product strategy. He has been passionate about the world of cybersecurity since his youth. Philippe is one of the first to have worked in intrusion detection and now gives many conferences on this subject.

## About Gatewatcher

European leader in the detection of cyber threats, Gatewatcher has been protecting the critical networks of worldwide large companies and public institutions since 2015. Our Network Detection and Response (NDR) and Cyber Threats Intelligence (CTI) solutions, quickly detect and respond to any cyber-attacks. Thanks to AI converging with dynamic analysis techniques, Gatewatcher delivers a real-time 360-degree view of threats, covering both cloud and on-premise infrastructures.

Designed to give users a head start on threats, Gatewatcher's solutions are acknowledged by cybersecurity experts. Public institutions and companies in critical industries (banking, insurance, energy, transport industry, defense, ect.) trust us to protect their critical computer networks. In April 2019, following a major audit, the ANSSI (French National Agency for Information Systems Security) announced the qualification of Gatewatcher's threat detection probe called TrackWatch, which officially received the agency's security visa after ruggedness and confidentiality tests.

Gatewatcher has always been committed to strengthening the cyber community. The company has been a Founding Member of the Cyber Campus (Paris La Défense) since 2021 and joined the European OpenXDR alliance in November of the same year.

In 2022, seven years after its inception, Gatewatcher announced its first round of founding, a €25 million round. In parallel, the company continued its international development through the signing of partnerships in the EMEA region, in the UK & Ireland, Germany, the Benelux & Nordic countries, as well as in Asia in Singapore. It now employs more than a hundred people spread over several offices in France (Paris and Rennes) and abroad.

In 2023, Gatewatcher was recognised for its high growth potential and selected as an emerging player in innovation by the French government's *French Tech 2030* acceleration programme, which aims to create global technological leaders.

## A proven detection *capability*

**+1200**
