

# COCKPIT\_

Pilot your cybersecurity

## Your business value

Cornerstone of your cyber strategy, Gatewatcher's NDR (AIONIQ) enables you to identify and characterise threats as early as possible, so you can quickly and effectively control your exposure surface. **But let's go even further!**

Once these elements have been gathered by our NDR platform, find out how best to **process this key information** within **COCKPIT**.

 **Reduce**  
your remediation time.

 **Prioritise**  
the management of your incidents.

 **Maximise**  
your investments in NDR.

## Cockpit is a platform :

### > INTUITIVE

It analyses in just one click and brings together the essential information to give you greater agility in handling incidents.

### > QUICK

It provides real operational support for your investigations, thanks to its speed of information processing, organisation and simplified communication.

### > INTELLIGENT

It automatically correlates similar incidents from your NDR and CTI alerts, to improve your analyses and reduce the fatigue of your cyber experts.

### > FLEXIBLE

It facilitates collaboration between the various stakeholders involved in the SOC and customers, for all types of organisations (end customers, MSSPs).

### > TAILOR-MADE

It adapts to the rights and uses of your environments, with different configuration options (ReBAC).

### > UNIFIED

It brings together all Gatewatcher functionalities (NDR & CTI) in a single SaaS platform for a global response.

## Key benefits

### **Prioritise** your investigation and remediation\_

Using accelerated, targeted analysis of critical alerts, you can dedicate your analysts to specific tasks or critical business IT areas, and make it easier for them to understand the threats

Follow their activity in real time and focus your teams' efforts on the most serious incidents to optimise your response time.

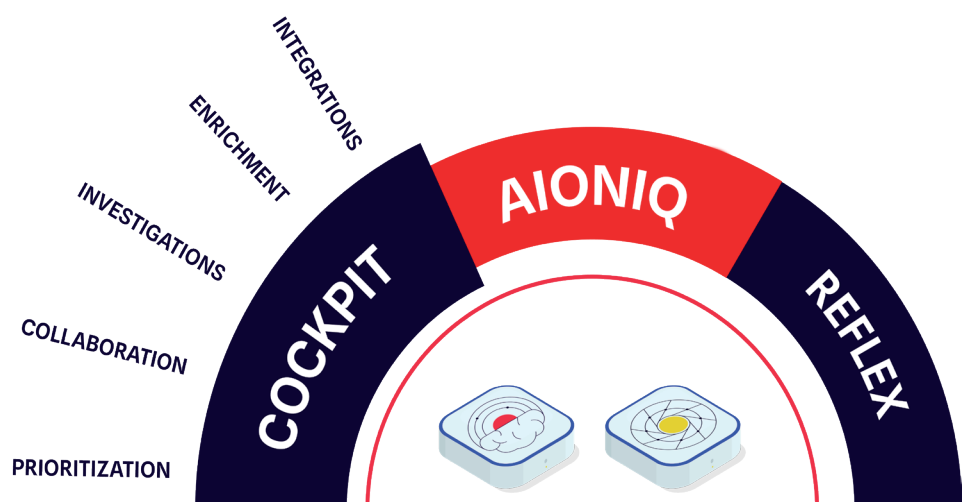

### **Simplify** the management of your environments\_

Thanks to a single platform, you can manage your different infrastructures from a single source and simplify the updating of all your security policies.

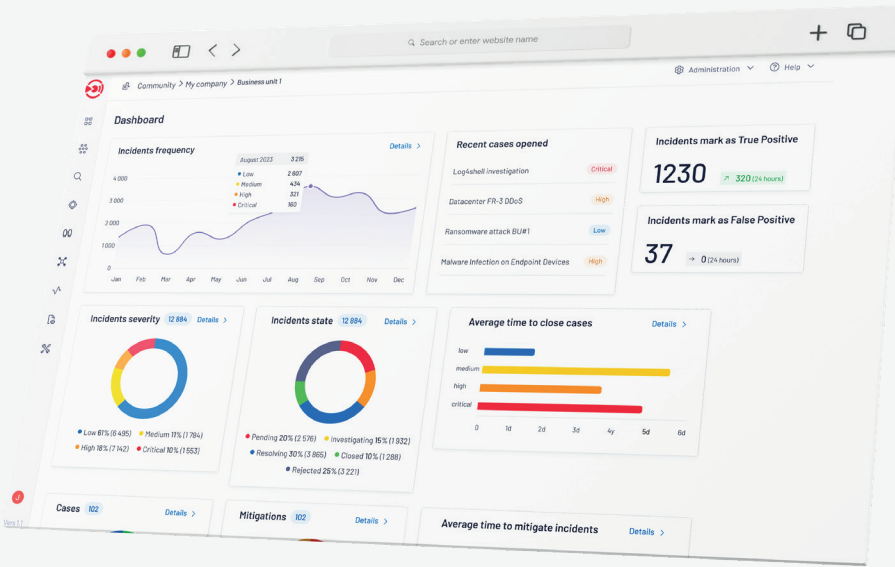

Maintain visibility and the ability to act in real-time on each of them (MSSP).

### **Adapt** the uses and shared responsibilities of the various stakeholders involved\_

For greater control and peace of mind when managing your critical environments, administrate the rights and accesses of the various users transparently and consistently, and make it easier for them to work together. Gain greater visibility in line with your responsibilities.

# An all-in-one management platform

- ✓ Level of severity of incidents (risk score)
- ✓ Categorise and prioritise incidents
- ✓ Mean time to detect (MTTD)
- ✓ Number of True or False positive incidents
- ✓ Number and status of current investigations
- ✓ Number of remediations
- ✓ Average remediation time for an incident (MTTR)
- ✓ Event frequency

## Features

### Intelligent, automatic consolidation of alerts into incidents\_

Boost your operational processing capabilities by intelligently consolidating enriched information in a single space, and continually improve your knowledge of threats.

### Advanced incident management capabilities\_

Refine your remediation strategy with automated investigations, and rapid, accurate categorisation of cybersecurity events. Significantly reduce the number of false positives.

### A global response in one click\_

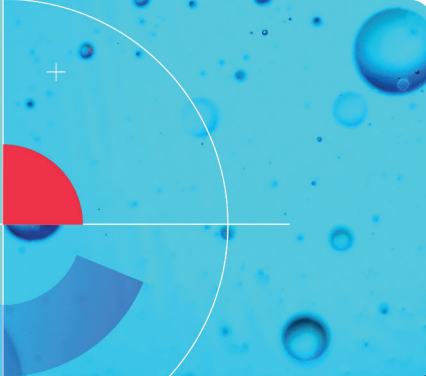

All the information gathered by our NDR and CTI solutions is available on a single SaaS platform. Improve your analysis and handling of security incidents and strengthen your response in a 100% automatic and integrated way, thanks to REFLEX.
