

## Detecting advanced persistent threats at early stages NDR, cornerstone of your *cybersecurity strategy*

### Your company faces a number of challenges:

A long time to detect threats, and particularly advanced persistent threats (APT).

A difficult evaluation and prioritisation of the criticality of alerts raised by analysts.

A recurring overload of cyber experts teams in the face of the number of false positives.

A complex cybersecurity protection that need to be adapted to a highly sophisticated and evolving threat environment

**1,8**

average number of successful attacks per year affecting organisations.

**207**

days on average for a company to detect a security breach in its network.

**53%**

of successful intrusions are not detected by the cyber detection tools already in place.

## GATEWATCHER NDR PLATFORM: a *unique* NDR solution

**Visibility**

Immediate 360° visibility of the assets and users present on the network, to facilitate investigations and speed up the search of 0-Day exploits.

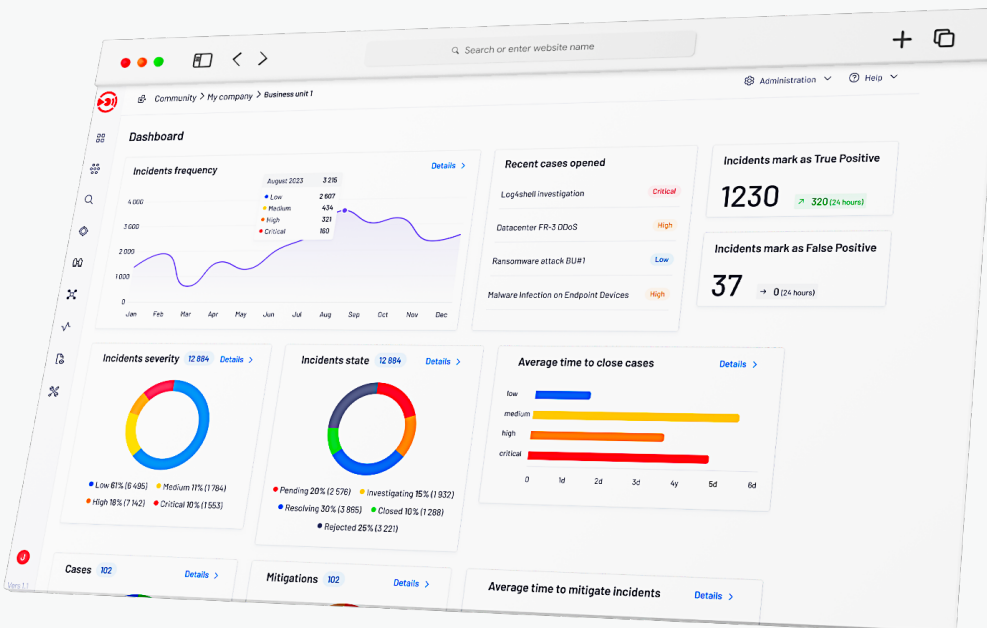

**Rapidity**

Multi-vector detection for the earliest possible remediation of intrusion attempts, thanks to intelligent analysis of the first weak signals.

**Control**

A solution that integrates seamlessly into your existing ecosystem, maximising the efficiency of your SOC teams without impact on your business.

easy as\_

**NDR**

## User benefits

### ✔ *Threat detection* including encrypted flows

Gain visibility of known, unknown and hidden threats based on all available metadata.

### ✔ *Operating flexibility*

Deploy an NDR without constraints, available in on-premise mode or within your cloud instances, in line with your current security policies.

### ✔ *Integration with your existing ecosystem*

Get a flexible, open solution with native or API integrations, interoperable with most tools on the market.

### ✔ *Automatic control and knowledge* of your network

Discover and map all your assets and user behaviours passively and using different models.

### ✔ *Consolidation and aggregation* of threats

Simplify investigations and remediations based on the MITRE ATT&CK framework to optimise the efficiency of your SOC.

### ✔ *Global threat remediation*

Benefit from response capabilities for endpoints, users and your perimeter protection.

## Features

### Plug-and-detect protection\_

Multi-vector detection is easily configured to offer tailored, ready-to-use protection without any impact on your production environment.

### Prioritising threats\_

Based on a risk score that changes according to your environment, quickly sort aggregated alerts and speed up decision-making by your SOC experts.

### Software platform resilient to cyber attacks\_

Increase your resistance to corruption attempts and reduce your attack surface with hardened OS, developed using a "Secure by design" approach.

### Flexible interconnection with the ecosystem\_

Through specific developments based on APIs, or through standardised connectors (EDR, XDR, SIEM, SOAR, NGFW), you can be sure of being interconnected with the entire ecosystem thanks to Gatewatcher NDR Platform.

### Research and anticipation of vulnerability exploitations\_

Make it easier for your SOC experts to proactively search for intrusions and deal with security incidents. They have access to all the data and metadata resulting from the analysis of network communications.

## About us\_

A leader in cyber threat detection, Gatewatcher has been protecting the networks of enterprises and public institutions, including the most critical, since 2015. By combining AI with dynamic analysis techniques, Gatewatcher's NDR platform supports SOC decision-making through contextualized analysis and alert triage. It enables autonomous, tailored responses to each identified threat by delivering complete visibility into network activity, across cloud and on-premises environments. Compatible with IT, OT, and IoT environments, it secures all critical assets while simplifying operations. Gatewatcher combines technological power with operational peace of mind, aligning cybersecurity with business objectives.

Gatewatcher has been recognized as a Visionary in the 2025 Gartner® Magic Quadrant™ for Network Detection and Response (NDR).
